1.5 Instructions for New Features

1.5.1 One-click Arming/Disarming

Support for one-click to arm or disarm alarm linkage actions in **ALARM** > **Disarming**.

Supports disarming by period. Users can disarm in the set time period, and cancel disarming out of the period.

Supports synchronizing disarming configuration from remote IPCs.

1.5.2 Non-Motor Vehicle Face Detection in Video Metadata

- i. Face is added as an attribute of non-motor vehicle detection. This feature supports non-motor vehicle + face display mode.
- ii. The attribute of face is added to non-motor vehicle detection. When a face is detected on the non-motor vehicle in live view, playback or searching result, the face picture and related attributes will be displayed along with non-motor vehicle information. When no face is detected, only non-motor vehicle information will be displayed.

iii. Non-motor vehicle + face mode selection is added for the display mode settings in Al search.

iv. The searching condition remains unchanged: non-motor vehicle. When a face is detected, the face picture and related attributes will be displayed along with non-motor vehicle information. When no face is detected, only non-motor vehicle information will be displayed.

1.5.3 Al Panel on Web

The **AI** panel on web supports the same functions as on local GUI. It can display intelligent events in real time, and display intelligent pictures and intelligent properties. When AI panel is enabled, you can find AI related information on the right side, and the supported intelligent events include: IVS, face detection, face comparison, video structuring, and plate detection.

1.5.4 Fast Live on Web

A **Fast Live** function is added on the upper-left corner of the LIVE interface. User can define the channel from which to start multi-window viewing. It starts from the first connected channel and is 4-window play by default.

4-Window live view applies main stream. If the split exceeds 4, the system applies sub stream.

1.5.5 Non-simultaneous Output

VGA and HDMI non-simultaneous output function outputs two difference images. One can play recorded video, and the other can play live image.

i. Parameter config

On the main menu, select **DISPLAY > Display**, and then config main screen and sub screen. The interface might vary depending on device model, and the actual interface shall prevail.

i. Sub screen shortcut menu

On the sub screen, right-click to show the shortcut menu. The menu provides actions including PTZ, split, and main port. Split supports up to 16 windows.
