

**Installation steps:**

- Step 1. Stick installation map on the surface you are going to install, and dig hole in accordance with hole position on the map. Insert expansion bolt into installation hole.
- Step 2. Fix screw on wall in accordance with the map, leave a space of 2mm~2.5mm between screw and wall.
- Step 3. Plug in power plug, put wire in order to their corresponding areas.
- Step 4. Hang the device on the screw.
