# DAHUA EU DIGITAL COVID CERTIFICATE VERIFICATION PRODUCT

Code Verification / Temperature Monitoring / Mask Detection

EU Digital COVID Certificate    Face Mask Detection    Temperature Monitoring    Easy Installation and Mobility
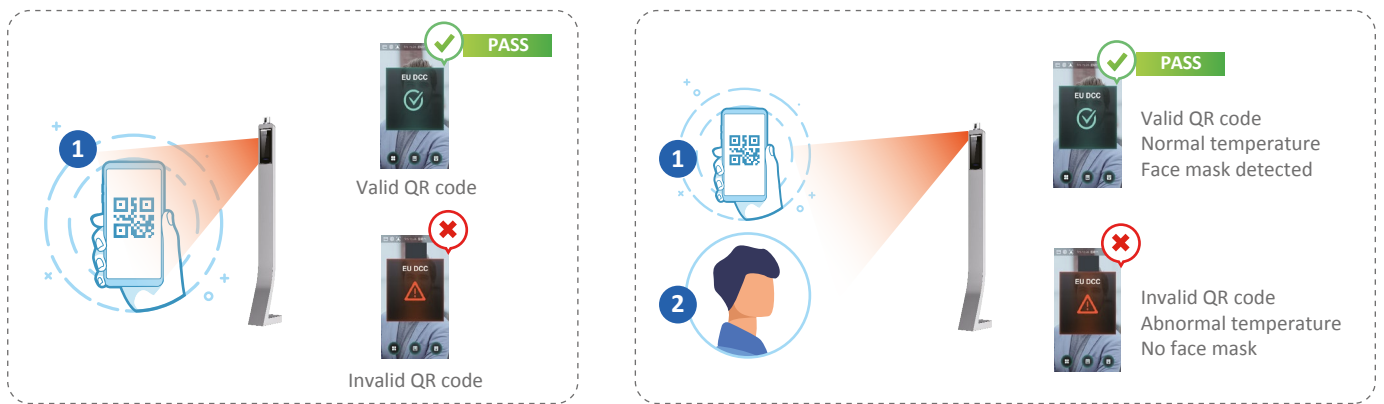

# Background

In 2020, the world entered a global health crisis forcing many countries to institute new policies and practices to alleviate its proliferation.

The EU Digital COVID Certificate Regulation entered into application on July 1, 2021 to help facilitate free movement inside the EU. The EU Digital COVID Certificate is a digital proof that a person has either: been vaccinated, received a negative test result, or has recovered.
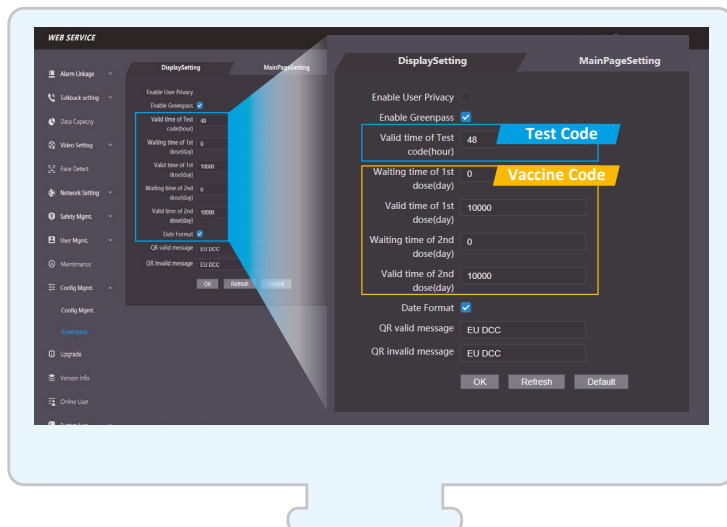

To help encourage the safety and security of building establishments, Dahua has released a verification solution for this certificate.

# Key Features

PASS
Valid QR code

Invalid QR code

PASS
Valid QR code
Normal temperature
Face mask detected

Invalid QR code
Abnormal temperature
No face mask

# Highlights

• QR code verification, and optional face mask detection and temperature monitoring functions (product model with T1 only).
• Web service allows configuration of verification rules, making it suitable for countries that may have different policies.
• Users' information are not displayed on the screen to protect their privacy.
• Contactless verification saves labor cost and helps prevent congestion.
• Flexible wall-mount, floor standing or turnstile installation.
