1 Release Notes

1.1 V2.820.000000.31.R.240423

Release Date

May 11, 2024

New Features

• None.

Optimized Features

• Change the default address to connect to external products.

Fixed Bugs

- Fixed the security redline issue PSIRT-2024-03016.
- Fixed the issue that the device abnormally restarted when there were no streams.

Third-party Access

- ONVIF testing tool: V20.06
- ONVIF: Supports Profile G
- Milestone testing tool: Milestone XProtect Corporate 2019 R2
- GENETEC testing tool: Security Center Version 5.7SR1(5.7.529.12)

1.2 V2.820.000000.29.R.240131

Release Date

February 29, 2024

New Features

• None.

Optimized Features

None.

Fixed Bugs

- Fixed the issues of the device occasionally not having any streams and restarting on its own.
- Fixed the network security issues.
- Fixed other general issues.

Third-party Access

- ONVIF testing tool: V20.06
- ONVIF: Supports Profile G
- Milestone testing tool: Milestone XProtect Corporate 2019 R2
- GENETEC testing tool: Security Center Version 5.7SR1(5.7.529.12)

2 Update Guide

2.1 Introduction

This document provides multiple update methods for the IPCs. Users can update the IPCs to the latest version according to the update guide. The update methods include updating by ConfigTool and DMSS app, through local update package, and cloud update on the webpage.

2.2 Preparation

Before the update, please ensure that the following conditions are met.

- Update by ConfigTool: The device can work normally; the computer is installed with ConfigTool; the device is on the same network as the computer; the update package is ready.
- Update by local package: The device can work normally; the device is on the same network as the computer that is used to log in to the webpage; the update package is ready.
- Cloud update on the webpage: The device can work normally and is connected to Internet; the device is on the same network as the computer that is used to log in to the webpage.
- Update by DMSS app: The device can work normally; the mobile phone is installed with DMSS app; the device is added to DMSS app.

 \square

- Check whether the device model and program version are correct before the update.
- Decompress the compressed program package when updating by the ConfigTool and through the local package.
- In addition to the main package, there is the algorithm package (firmware.bin). When updating
 the system by ConfigTool and local package, update the main package first, restart the device,
 and then update the algorithm package. If you select cloud update, the algorithm package will
 be automatically updated.
- In addition to the main package, there is the FPGA program package. Update the main package first, and then update the FPGA program package after restarting the device.

2.3 Instructions

2.3.1 Updating by ConfigTool

2.3.1.1 Updating One by One

Use this update method when you need to update a single device.

Procedure

- <u>Step 1</u> Open ConfigTool, and then select **Device Upgrade**.
- <u>Step 2</u> Click **Search Setting** to set the search conditions.

Figure 2-1 Set search condition

<u>Step 3</u> Select **Current Segment Search**, change the password to the IPC password, and then click **OK**.

Figure 2-2 View search result

- <u>Step 4</u> Click \square next to the device to be updated, and then select the update file.
- <u>Step 5</u> Click 1 to start to update the system.

The device automatically restarts after the update is complete.

 \square

If the system update fails, check the prompt on the ConfigTool to see the reason.

2.3.1.2 Updating in Batches

Use this method when you need to update multiple devices to the same software version.

Procedure

<u>Step 1</u> Open ConfigTool, and then select **Device Upgrade**.

- <u>Step 2</u> Click **Search Setting** to set the search conditions.
- <u>Step 3</u> Select **Current Segment Search**, change the password to the IPC password, and then click **OK**.

Upgrade File Path:	Browse

<u>Step 6</u> Click **OK** to start to update the system.

The device automatically restarts after the update is complete.

If the system update fails, check the prompt on the ConfigTool to see the reason.

2.3.2 Updating through the Webpage

Procedure

<u>Step 1</u>	Log in to the webpage of the device.
<u>Step 2</u>	Select Settings > System > Update to enter the system update page.

Information		

Step 3 Click Manual Check.

Select Auto-check, and when a new version is available, the device automatically detects it.

- <u>Step 4</u> If a new version is available, click **Update Now**. The system downloads the version file and starts the update process.
- <u>Step 5</u> After the restart, you are redirected to the login page for you to log in to the device again.

2.3.4 Cloud Update through DMSS

Procedure

- Step 1 Open DMSS app.
- Step 2 Select **Device Details**.

If it displays **Update Available** on **Cloud Update** area, then there is available new version for update.

< Device Details	<
Wide Dynamic Range Enabled for high contrast scenes, to have its brightness and shaded areas balance simultaneously so the image is neither blown out nor too dark.	
Auto Tracking After the function is enabled, the camera can focus on and track the targets.

- <u>Step 3</u> Tap **Cloud Update** to go to the update page.
- <u>Step 4</u> Confirm the **Current Version** and **Latest Version**, and then tap **Update**.
- <u>Step 5</u> After being updated successfully, the device will restart.

2.4 Checking for Update Success

2.4.1 Checking the Result of Update by ConfigTool

After the update is complete, wait until the device restarts. Click ${f O}$ to check the system version.

If the version is the same as the software version of the update package, it means the update is successful.
